

Is your institution already a partner or is interested to participate in an FP7 or Horizon 2020 project?

If yes, and if you need advice, consultancy or guidance for the future, find your National Contact Point at:

http://cordis.europa.eu/fp7/ncp_en.html

EuroRIs-Net+ is the European Network of National Contact Points for Research Infrastructure programme (most RI NCPs are members of the network). Research Infrastructures NCPs could also help users identify Transnational Access opportunities, based on EuroRIs-Net+ available tools and services.

At our website

www.euroris-net.eu

you will find more information and news concerning the research infrastructures area, like events, success stories, info on related projects, including news on activities and our project consortium.

Through the website you can also access the Knowledge Repository, housing documents concerning research infrastructures, as well as information on the policy level area at both European and national level. You are also invited to visit the Frequently Asked Questions on Research Infrastructures programme.

European Network of National Contact Points for Research Infrastructures moving forward

More information is available in the project twin leaflet “**Repository, Observatory, Forum**”.

The 2-year EuroRIs-Net+ Project (no. 283663) is supported by DG Information Society and Media of the European Commission under the Research Infrastructures Programme of the 7th Framework Programme of R&D.

Transnational Access to Research Infrastructures
How it works?

free Access

free Services

www.euroris-net.eu

www.euroris-net.eu

Transnational Access

- Do you want to run experiments in the best European laboratories?
- Are you interested in making analyses using the best research equipment?
- Do you care about accurate measurements?
- Are you looking for access to unique collections of specimens or documents?
- Do you wish to take part in a research vessel expedition?

Are You Interested Now?

Just respond to a call for proposals at the project website of your interest. Some projects periodically announce calls, others apply a continuous application process. Apart from the costs of research itself, travel, accommodation and subsistence costs may be reimbursed.

You can find all open calls and other info about Integrating Activities projects by accessing our project website, and more specifically, the **Transnational Access Opportunities** section.

On our website, click:

Transnational Access Opportunities

to be informed on opportunities available and submission procedures.

E-Infrastructures Services

- Do you need sophisticated computer services?
- Are you interested in access to powerful computers, networks, grids, repositories, databanks?
- Do you have needs for safely storing large quantities of scientific data?
- Do you want to be a part of networked research communities that share computing platforms and advanced applications running next generation protocols?
- Do you wish to work in the frame of world-class operational communication and computing infrastructure to facilitate scientific research?

Are You Afraid All This Is Expensive?

Find an opportunity for free transnational access to European research infrastructures, through our website:

www.euroris-net.eu

The EU Integrating Activities projects offer grants up to 3 months long, to cover your travel, accommodation, and access (i.e. research activity) costs.

More than 60 Integrating Activities projects, in all scientific fields, are financed by the 7th Framework Programme funds.

All this free of charge!

Ca 130 e-infrastructures projects are financed by the 7th Framework Programme funds.

You can find the information about e-infrastructures projects at:

www.euroris-net.eu
