The European e·Infrastructures Observatory to be unveiled at the e-IRG Workshop on June 11, 2012

Tell your story with the European e·Infrastructures Observatory

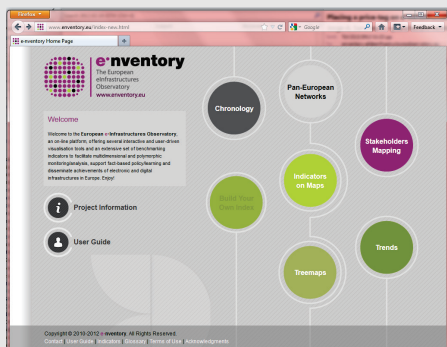

The **European e·Infrastructures Observatory** (www.e-observatory.eu) will be officially unveiled at the e-IRG Workshop organised under the Danish EU Presidency on June 11, 2012, in Copenhagen. The European e·Infrastructures Observatory is an on-line platform, offering interactive and user-driven visualisation tools and an extensive set of benchmarking indicators to facilitate multidimensional and polymorphic monitoring and analysis, support fact-based policy and learning and disseminate achievements of electronic infrastructures in Europe and beyond.

The European e·Infrastructures Observatory:

- Offers **7** intuitive, interactive and user-friendly visualisation tools based on best practices in visualisation and representation techniques;
- Features a core set of **45** benchmarking indicators that are the baseline for monitoring e·Infrastructures development progress, usage, impact and investments drawn;
- Provides access to more than **10.000** individual figures and other related data and benchmarks;
- Consolidates more than **18** months of stakeholders' feedback and consensus on the structure and functionality of a world-class observatory.

The e·Observatory coordinator, Dr. Jorge-A. Sanchez-P., said: "The European e·Infrastructures Observatory aspires to be enjoyed by all e·Infrastructures stakeholders in assisting them with a practical tool for monitoring the development progress of the constantly expanding and emerging themes of e·Infrastructures across the European Union, as well as by the public-at-large offering them a unique dissemination platform of European e·Infrastructure success stories and new initiatives. Everyone is invited to *tell their story with the European e·Infrastructures Observatory!*"

The e·Observatory has been developed by the **e·nventory** project, co-financed by EU's 7th Framework Programme for R&D under Grant Agreement no RI-261554. The **e·nventory** project acknowledges the invaluable support and contribution of European flagship e·Infrastructures initiatives and coordinating organisations: GEANT, DANTE, TERENA, EGI.eu, PRACE and its Advisory Board (<http://www.enventory.eu/advisory-board.html>).
